Turfstone™

Belgard® has created the environmentally responsible Turfstone™ Grid Pavement. When used as part of a Permeable Paver System, the voids are filled with clean aggregate to allow rainwater to filter down, rather than runoff, and infiltrate back into the underlying soil. By filling the voids with topsoil and using a standard road base, the design of Turfstone allows greenery to grow through it creating a unique hardscape design that can handle light vehicle traffic and works with the beauty of the land.
